POWDERLY'S OTTESTION. Fr. Powderly asks the newspapers to answer

whether they condemn the boycott, when prac-liced by an employer, as cordially as they condemn it when practiced by the workingman. He cities a case of a minufacturer who dis-charged certain employes because they had joined the Knights of Labor. If the employer discharged the men solely because they had natical with an association of working men, act-ing only within law and order for the protection of the legal rights and legitimate interests labor, without any attempt to wrong by lawies violence the legal rights and legitimate interests of the employer, then in our judgment the em-ployer would violate public policy and moral justice to discharge the men. But suppose the Knights of Labor become communicide and americal in speech and action, no one would then question the right of the em-ployer to diamise any workman who belonged to an order which compels men to strike and destroy business without nolice, without cause sage to poycott an employer or non-union employes. The employer could fairly say that "as a man of property I cannot have men in my scriply, who are engaged in a purpose I believe to be destructive to my interests." Suppose the Martin Trons faction of the Knights of Labor ordered a sudden strike, and a man employed to watch a line of railway willfully broke has contract and ran away at a time when his absence night cause as least great in-convenience, would Powderly think the railway whu, is to such a lodge of organized labor? The law admits the right of working men not only to strike, but to persuade other working men to adopt their views, accept their resolu-tions and intribute major, to say that no man tone and join their union, to say that no man acall join their society or stay in it who will not agree to their roise; they have a right to say tost they will not work with men who have artes in such a wayes, in their judgment, to hijors the common cause of the trade, by placing themserved in opposition to the interests of the union, that they show no right to coerce or intimidate any man into agreement with them. To refuse to sesociate with a man is a very different thing The manufacturing a right to molect or frighten him.
The manufacturing company referred to by
Powderly is located at Springfield, Ohio; it had ist reason to dread the Enights of Labor, for they had just boyrotted a great concern engaged in the same industry at Chicago, not because of any dispute over wages, or bours, but because the company refused to discharge a few old and faithful non-union employes, and this refuse was followed by the strike and the boycott. The Springfield firm was fairly forewarned, and at once forearmed by relusing to employ Enights of Labor. The employers do not ob ject to the Knights of Labor who obey Powderly, but they justly dread and denounce those who work the laws a will of Martin Irona, and near of his kidne. HWS

"THE OREGONIAN" AND THE YA-QUINA BAY APPROPRIATION.

The Yaquina Post makes the utterly false statement that "The Obsidence is kicking because as it [The Orecosian] charges, Yaquiun bay is getting too large a percentage of the amount allotted to oregon by the appropriation bill now before the sequela." On the contrary this journal has advocated the ciains of Yaquina **bay and will** be glad to see it get a large appropristion—the larger the Better. We regard the work at Yaquina bay, and have repeatedly se stated, is the plainest terms, as next in importance to that at the month of the Columbia river.
While we cannot believe that Vaquina will ever be a great port for foreign shipment, like the Columbia fiver, we do believe that it will al-ways do a considerable constitute business. The particular advantage from improvement of its har will, we believe, be the effect upon neight charges for service via the Columbia riser. The existence of a rival port, small though if he will always exert a wholesome cleek upon Columbia river freight rates. At ready we see the effect of the competition af-forded by the Gregon Pacific road and its steamer connections with San Francisco. Merchants at many points in the Willamelte valley find it to O. B. & N. company will have to meet the terms of the Oregon Pacific company, and will do .t. of course, rather than lose linsiness. THE CREGORIAN has no interest in steamship profits and is very glad to see cheaper freights. It would indeed, as the Post suggests, be "unworthy a great and prospersons journal" to appose an appropriation for Yaquina bay on petry local grounds. THE UREGOMAN, has not done this. but exactly the reverse, and the Post ought to vay of the general good for any local advantage.

The Post's misunderstanding apparently grows out of incapacity on the coand to distinguish between a news ten and an editorial expression, and on the other hand to understand plain reading. Senator boloh, unded by friends of the increase the proposed aspropriation. From Sov,-20. to \$100,000. A Washington dispatch of the 14th lust, published in The Organisms the felout that Yagoi is tay had been awarded by the bride acc house an execution dry large per cent of the additional now on trial was \$500, entineers' estimates and declared, purely as a matter of policy, that the assertions recontly made in some of the Cregon papers that Dalph can force the sensite executive to increase the appropriation for Yey day hay are considered very ill-flued, and calculated to injure his infence with the committee, to the disadvantage of oregon improvements." This is the basis for a tirade a c-lump long against The One-Genas, in which is position is fulurioud and its motives impagnent. Even a very limited intelligence. gence would have saved the Post from this about misunderstanding.

## TV SA LEAP OF HISTORY.

Gen. Gibbon in his speech at the banquat of he British Benezolent seculty referred to the ba )py settlement of the chegon bound or ques-tion by treaty forty years ago. More then once the dispute about the Oregon boundary line had very nearly become an organization for war between England and the United States. In the time of Minister George Canning there was a crais during which, to quote the words of an English statesman, "war could have been bright shout by the holding up of a firger."

In 1818 an attempt at an arrangement was made, but failed. The two governments then agreed to leave the disputed region between Brglish and American territory west of the Rocky monotains to joint occupation for ten regers, after which the subject was to be opened again. When the end of the first term came Canning did his best to bring about a settlement but failed. The dispute involved the ownership of the Columbia river and the island of Vancouver, off the shore of British Columbia. The joint occu-pancy was renewed for an indefinite time, but pancy was renewed for an indemnie time, our in IRSA President Tyler peremptority called for a final settlement of the boundary. The Oregon question was a party dry for more than two two years within and without congress. At that time 4 war with Rogland would have been popular with a large proportion of the American people, and was averted by the moderate and conciliators conduct of Lord Aberdeen, who held the place of foreign secretary in the Peel cabinet. He offened a compromise which was at last accepted, and on June 15, 1816, the Oregon treaty was signed. The dividing line was to be "the 49th degree of latitude from the Rocky mountains west to the middle of the channel reparating Vancouver island from the mainthence southerly through the middle of the moland of locals straits to the Pacific." The channel and the straits, were to be free, as also the great northern branch of the Columbia, river. By this treaty: Vancouver's bland, re-maned to finet Britain, and the free navigation of the Columbia river was seened. This treaty

settled the question for that time, but an importain part of it came up again for settlement many years after. The commissioners appointed to determine that portion of its boundary which was to run southerly through the middle of the channel, were unable to come to any agreement on the subject, and this new question agreement on the supper, and the sanguestion frown as the San Juan boundary lecame part of the famous treaty of Washington in 1871, and was finally settled by the arbitration of the em-peror of Germany, who decided that the American claim to the ownership of the amail faland ted States, was just. San Juan was evacuated by England, in consequence of this award, at the close of 1873.

When the sundry civil appropriation bill comes before the senate Mr. Dolph will move to insert the following item: "For : le establishment of a salmon hatchery upon the Columbia river or its tributaries, and for the current expenses of the same for one year, \*20,000." It is highly important that this appropriation should be made, and we are assued that Mr. Dolph will spare no effort in its behalf. It is true that salmon are still plentiful if the Comm-bia river; but it is fool so to believe that they ha free, but it is fool as to believe that they will remain plentiful under the present practice of taking out millions of fish each year just before the spawning time. The articial method of replenishing streams has been proved to be entirely efficient, and if it is not put in operation here the Columbia river in a few years will be barren of fish, and one of our great productive industries will be ruined. Our callerymen are willing to help, but they look upon a hatch

MOB RULK AI TOBORTO
TORORTO, May 25.—For over three hours towith the ofly was under mob risk. Word was received by highing of Labor that considers from
3-la-sing for the use of the street railroad strikers
with a arrived here between 6 and 7 o clock to neight,
and 1 large growd weat to meet them, accompan

ted by a brass band. On their arrival be omnibuses were driven slowly flrough the principal sirects the crowd gradually increasing in number a til needly 2000 persons were following a the procession. Every street car not on the r time was attacked with bricks and stones, passengers, drivers and conductors were in med, and the widest upriar was kept up the police being poweriess to do say thing. Hetween the fix and forty street cars were wrecked in this way, and are now lying in the couplanty a shops. Buch a scene has seldom, if ever been seen in Toronto. Fortunately, so fa as severtated no per som was dangerously injured Had not the Knights of Labor broken up the procession much more serious results we nich have followed.
